DETAILED ACTION

Additional Prior Art

Thompson (US 3,906,241), Stewart et al (US 5,351,117) and Wach et al (US6,370,406 B1) disclose the advantage of detecting/measuring Raman scattering of increased wavelength (the Stokes shift) over Raman scattering of reduced wavelength (the anti-Stokes shift). Attention is directed to lines 6-12 in column 2 of Thompson, lines 55-58 in column 1 of Stewart et al and lines 46 and 47 in column 69 of Wach et al.

Allowable Subject Matter

Claims 1-6 are allowed over the prior art of record.

Examiner's Statement of Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

As to independent claim 1, the prior art of record, taken alone or in combination, fails to disclose or render obvious a Raman probe for measuring Raman spectrum comprising an edge filter mounted on a light-incident end of the receiving light-guide path, the edge filter passing Raman-scattered light from the sample while blocking the excitation light, wherein the edge filter is a short-wavelength transmitting filter that permits passage of wavelengths shorter than the excitation wavelength, in combination with the rest of the limitations of claim 1. Also, see applicant's remarks in the paragraph bridging pages 12 and 13 of in the "**REMARKS**" section of response filed on September 11, 2006.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Fax/Telephone Numbers

Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner whose telephone number is (571) 272-2414.
